

## BI Assessment

A proven approach to ensuring success for your BI project.

"51% of technology executives say data and analytics will be the top driver of revenue growth in the future, ahead of cloud and mobile technology."

- CIO Magazine, Aug 2014

### The Value of Best Practices

AST knows that the key to a successful IT project is the ability to integrate project management best practices, proven project lifecycle steps, and effective quality assurance activities within a structured framework.

The AST BI Assessment provides value by:

- Defining strategies to develop clear business objectives and information requirements
- Satisfying stated business objectives
- Aligning available resource skills with project activities
- Managing risk
- Providing proven planning & project management for development and implementation

Today's Business Intelligence (BI) initiatives must demonstrate solid and rapid results to business users and other stakeholders. Loosely-managed scope and poor planning can quickly derail a BI project. Effective project management and application of technology are key – but so are planning and execution.

The AST BI Assessment is a proven mechanism to mitigate risk, gain a sound understanding of the initiative's scope, capture requirements, and ultimately establish a clear foundation to move forward.

Our concise offering rapidly leverages our proven methodology and approach, which is based on key projects and years of collective business and information technology experience. The AST BI Assessment targets:

- Current State Analysis and Assessment
- Business Cases and Priorities
- BI Roadmap Development
- Recommendations and Action Plan

## Specialized. Recognized. Preferred.

As an Oracle BI Pillar Partner, we enable our customers with actionable insights for their BI programs. We understand how to apply BI best practices to unique business challenges.

During this 2 to 4 week engagement, we will focus on analysis and development of critical success factors. We include a risk assessment which highlights areas that have potential adverse impact, with related likelihood.

AST Corporation is an Oracle PartnerNetwork Platinum Partner, an Oracle Pillar Partner, and three-time recipient of the Oracle Excellence Award.
