

# Business Intelligence

## Make your data actionable.

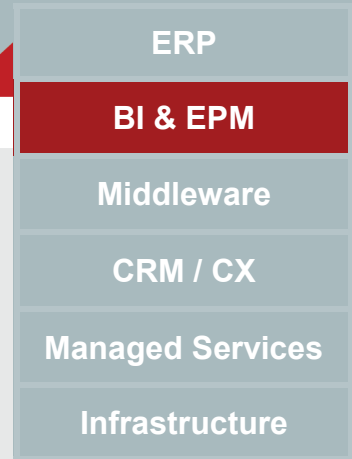

As an Oracle BI Pillar Partner with Oracle Specializations (BI Cloud Service, Oracle BI Foundation and Oracle BI Applications), our BI services focus on all aspects of your critical initiatives, from understanding, integrating and managing data to deploying robust analytics, dashboards and scorecard solutions.

Within our BI and Data Warehouse (DW) practice, we bring best practices to all aspects of project strategy, implementation and management, including experience deploying cloud solutions. Whatever the project size, our services focus on results, taking all stakeholders into account, emphasizing a foundation of trusted data to provide insight, support business strategies, and disseminate actionable and interactive content.

## Specialized. Recognized. Preferred.

We differentiate ourselves with clear, pragmatic advice, balancing the options that add value and delivering immediate insights to your users. With a focus on aligning your business with technology and scope, and strict adherence to BI standards and best practice analytics workflows, a solution delivery is possible within weeks.

We bring verifiable experience, proven methodologies and best practices to each project. Your project is not complete without knowledge transfer, training and post-production support, provided by AST, to ensure your organization will realize the full benefits of investing in Business Intelligence.
