Oracle EPM - Hyperion Services

Get results through analysis.

Effective analysis and performance management is a constant challenge for today's data-driven organizations with increasingly complex processes and diverse systems. Our Enterprise Performance Management (EPM) services help address your strategic needs, particularly with cloud options, and will truly transform your organization.

Companies that undergo successful EPM initiatives understand the vital role that Hyperion's superior analytical and reporting capabilities play in meeting their key performance goals. For corporations and public sector agencies alike, AST's EPM services focus on achieving results that are well received by stakeholders. As EPM technology enablers, we emphasize a foundation of trusted data that leads to enterprise-wide insights and supports strategic planning and dissemination of actionable content.

Specialized. Recognized. Preferred.

In addition to in-depth strategic, financial and operational support, executives and decision-makers seek integration with their ERP system. Complicating matters further is the need to meet enhanced governance, risk and compliance requirements. Organizations today must achieve the highest levels of financial integrity and transparency, while considering the TCO benefits of Oracle EPM Cloud.

Within our EPM practice, we offer best practices for all aspects of implementation and management of Oracle Hyperion solutions. With a disciplined project management methodology and team of skilled and experienced full time employees, we help you get results in record time. We understand how to align technology with your business functions to achieve your corporate objectives.
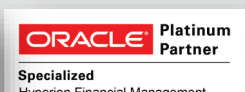

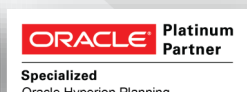

AST and Oracle Hyperion solutions can help your organization gain the effectiveness and efficiency that it desires.
