Customer Testimonials

"The project was extremely complex, very invasive, and it required a significant amount of planning and coordination, but the combined teams from AST and the CAP delivered a successful implementation."

CFO, College of American Pathologists

The breadth of products offered by Oracle Middleware often makes it challenging for organizations to ensure that IT staff is trained to the appropriate level and to control incident management with internal resources. Because of this, challenges often extend past the initial implementation.

AST's Managed Services team supports organizations that are at the forefront of Middleware innovation. With deep expertise on the full range of Oracle products, our resources are Oracle-Certified, with both implementation and support experience.

As an Oracle SOA Pillar Partner, we are adept at:

- Delivering ongoing support for existing SOA processes
- Performing regular backup, recovery & performance tuning tasks
- Maintaining the Oracle Middleware platform at the latest version
- Managing Oracle UCM & AP Automation solutions
- Maintaining the Oracle IDM Suite, integrated with Oracle EBS and custom applications
- Upgrading OAF-based applications to Oracle ADF
- Providing enhancements using any Oracle Middleware product

Specialized. Recognized. Preferred.

AST has been effectively and proactively managing Oracle systems since 2002. Our resources are experienced, professional and Oracle-Certified. As an Oracle Platinum Partner and Oracle SOA Pillar Partner, we can provide access to Oracle development and product information to the benefit of our clients. Our flexible Service Level Agreements (SLA) and Support Models are tailored to your organization and maximize the value of our offerings.

AST Corporation is an Oracle PartnerNetwork Platinum Partner, an Oracle Pillar Partner, and three-time recipient of the Oracle Excellence Award.
