

Security and IDM

Secure applications and data on-premise or in the cloud.

As an Oracle Platinum Partner specialized in Oracle Identity Governance and Oracle Access Management, our services focus on every aspect of Enterprise Security.

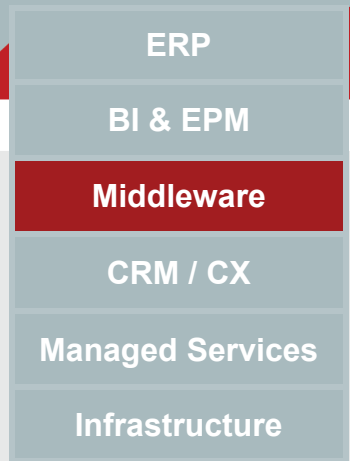

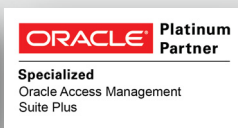

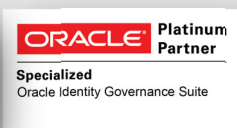

We've helped many organizations provide users with secure access to resources and assets, including:

- **Access Management:** Solutions for securing applications, data, web service and cloud-based services, including single sign-on.
- **Authorization Services:** Solutions for securing resources.
- **Identity Governance:** Comprehensive implementation services enabling identity compliance and providing users with many features, from self-service registration to privileged account management.
- **Directory Implementation Services:** A complete set of capabilities.
- **Mobile Security Services:** To adopt, deploy, and manage data without interfering with personal phone use.
- **Governance, Risk Management, and Compliance:** Services to assist in GRC.
- **Database Security/Auditing:** Solutions for database security and auditing requirements.

Specialized. Recognized. Preferred.

"I would like to congratulate the AST team on a very successful Oracle Identity and Access Management implementation at the CAP."

— Stephen Myers, Chief Administrative & Financial Officer, College of American Pathologists
