

Grants Analytics

A Business Intelligence Solution for Grants.

Grants Analytics at a Glance

- Pre-built, in-depth analytics for Oracle Projects and Grants modules
- Architected on industry-leading Oracle Business Intelligence platform
- Complementary extensions to Oracle BI Applications foundation
- Empowers executives with real-time funds status
- Leverages filters and quick drill-down access
- Designed to facilitate user acceptance and adoption

Your organization needs a solution that provides a full-view of your grants department: project funding status, the awards that fund a project, the status of each award, along with the ability to drill into how much was originally allocated, what was spent, how much is left, how much is billed, and how much is received.

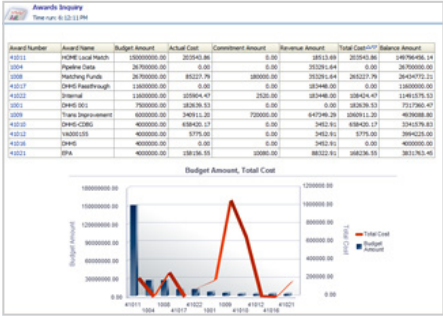

Based on our implementation experience, our Grants Analytics solution is designed with your concerns in mind. Grants Analytics is the only pre-built solution that enables real-time analysis and data investigation of the Oracle Grants module. Grants Analytics encompasses Oracle Grants Accounting, Project Costing, and Assets, and allows real-time fund analysis, quick drill down access, enhanced reporting, dashboards, and convenient control features.

With interactive dashboards and reports, Grants Analytics can be quickly implemented. Grants Analytics enables transparent analytics for awards or funding from the top-down to project-level or task-level amounts. It enhances efficiency and offers insight into actions.

Specialized. Recognized. Preferred.

Out-Of-The-Box Functionality

- Catalog of Grants metrics across dashboards and reports
- Capital Projects Dashboard, drillable into details to get to the transaction-level data
- Drillable project and funding details by award
- Reports for billed and unbilled expenses by award or funding source
- Reports by award, drillable into details to get to transaction-level data
- Reports including summary by project, funding status, awards that fund a project and status of each award, how much originally allocated, amount spent, amount remaining, amount billed & amount received
- Reports for assets by funding source
- Reports for awards funding specific projects
- Reports for current year awards, award status, funding source (customer) that show award amount, percent complete, and amount remaining
- Metrics commonly available in amounts (\$) and hours
