Criminal Justice Information Services

Achieve CJIS compliance with global standards-based integration

Business Drivers

- Critical, timely, and secure access to Interagency data
- Real-time data availability
- Secure integration
- Reusability
- Modular deployment
- CJIS compliant for NIBRS, UCR, NCIC, N-DEX
- End-to-end NIEM standards-based data exchange
- Encryption and security with authentication, authorization configured to GSC guidelines

Services Provided:

- Security Strategy, Assessment, and Design
- Audit Compliance
- On-premise and Cloud Integration
- SOA/BPM/Service Bus
- CJIS Analytics
- Master Data Management
- Infrastructure Management
- Back-up, Recovery, and Performance Tuning
- Legacy Systems Migration

Information sharing among Justice and Public Safety (JPS) agencies is crucial in today's risk-filled landscape. Criminal Justice Information Services (CJIS) systems should:

- Align with the guidelines of the Department of Justice;
- Strengthen data sharing, process collaboration, and decision support between agencies and across disparate channels; and
- Enable partners to correlate, manage, and share increasing amounts of vital, sensitive data.

AST's Oracle-based CJIS services include:

- Service Oriented Architecture (SOA) configured to Global Reference Architecture (GRA) guidelines;
- Security and encryption for Global Federated Identity and Privilege Management (GFIPM), FIPS 140-2, and fedRAMP compliance; and
- National Information Exchange Model (NIEM) adoption.

Specialized. Recognized. Preferred.

AST is a leader in Public Sector SOA and security, with key technical skills and experience with compliance and funding. Our CJIS services apply to many JPS scenarios, including:

- Organizations that previously had limited access to real-time CJIS are now able to collaborate with larger agencies;
- Agencies seeking to automate court or jail management systems for cost-cutting and efficiency; or
- Groups of agencies that require the ability to coordinate emergency responses across multiple layers of law enforcement.

AST ensures seamless access to mission-critical information.

AST Corporation is an Oracle PartnerNetwork Platinum Partner, an Oracle Pillar Partner, and three-time recipient of the Oracle Excellence Award.
