AST Launches AST Cloud Connect for Rapid Integration with Oracle Cloud Applications

Naperville, IL November 30, 2016: AST Corporation today announced the launch of its flagship cloud integration solution, AST Cloud Connect, which enables enterprises to rapidly integrate with Oracle Cloud Applications and achieve implementation agility with the industry-proven Oracle Service-Oriented Architecture (SOA) platform.

One of the biggest challenges of cloud migration has been the lack of integration options allowing organizations to easily respond to cloud complexities. Implementations often start with a set of pre-conceived notions about cloud features and functions, which change throughout the project life-cycle to meet evolving business needs. Such changes, which are generally raised late in the implementation process, increase costs and timelines as integration teams race to address the gaps.

AST Cloud Connect addresses these complexities by providing a code-free integration framework that can easily and rapidly be configured for any integration need. This enables implementation teams to focus on testing and validating cloud features, allowing timely and efficient execution in smaller cycles, and resulting in up to a 40% reduction in the implementation timeline.

About AST Corporation

Established in 1995, AST Corporation is a Cloud Premier Platinum member of Oracle PartnerNetwork (OPN), Specialized Oracle Applications and Technologies systems integrator, an Oracle University training and delivery partner, and a certified Oracle Cloud Services implementation provider. AST's services encompass all aspects of Oracle Cloud, E-Business Suite, Business Intelligence, Enterprise Performance Management, Middleware, Master Data Management, and Customer Relationship Management implementations, as well as flexible on-shore & off-shore Managed Services. In September 2015, AST acquired Santa Clara, California-based Serene Corporation, a recognized brand in the Hi-Tech, Health Sciences, Engineering & Construction, and Financial Services industries. Serene Corporation, a leader in Oracle Customer Relationship Management and Master Data Management implementation services, strengthens AST's ability to deliver complex enterprise applications projects across a wider array of industries. AST serves industry-leading public sector and commercial organizations: municipal, state, and federal government; public transportation; airport and seaport; K-12 and secondary education; utilities/energy; manufacturing; insurance; retailing; telecommunications. Clients look to AST Corporation for leadership and assistance in systems integration, business process redesign, project management, systems administration, and training.
